PRECISION AND CONTROL AT EVERY DROP

Drawing from a solid understanding of water management constraints complemented by direct collaboration with experts and farmers, GrowData Irrigate offers a smart, sustainable hardware and software solution to water management.

It's precision irrigation blended with connectivity and automation, ensuring every drop is effectively utilised.

Irrigation, Connectivity, Automation

Features and Benefits

Optimise your water usage and on-farm connectivity with Irrigate.

- **Integrated WiFi Mesh Network:** Ensures seamless connectivity across the farm, enabling effective communication between devices regardless of location.
- **System Integrations:** Compatible with existing agricultural systems, allowing for a smooth transition and enhancement of current infrastructures.
- **Advanced Dashboards and Analytics:** Provide comprehensive insights into irrigation patterns and effectiveness, with detailed analytics that inform better water management decisions.
- **Sensor Compatibility:** Supports a wide range of sensors, including SDI-12, moisture sensors, and dendrometers, integrating various data points into a unified management system.

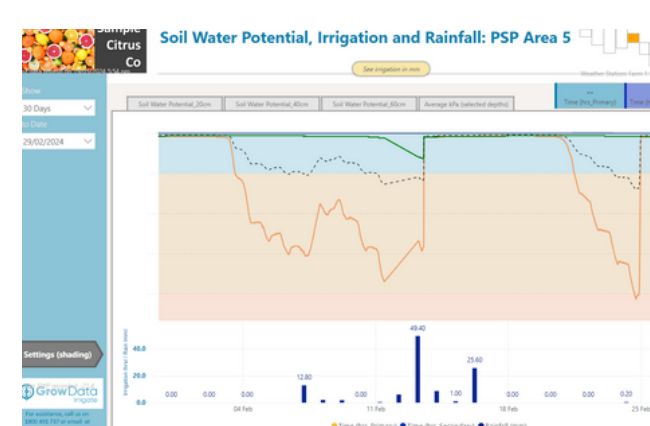

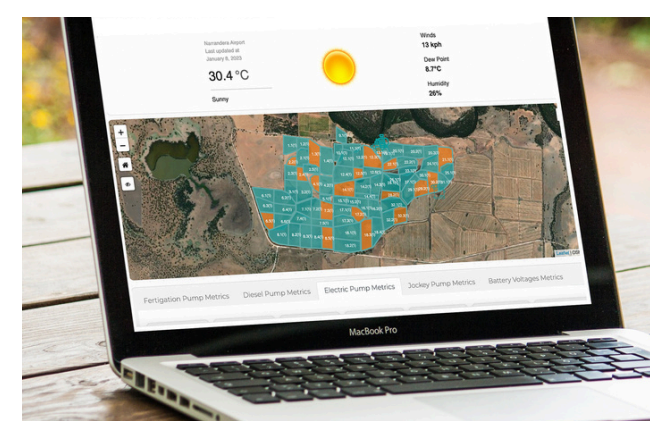

About Us

Founded in 2012 by Jennie Savill and drawing on the rich agricultural legacy of her family, Inform Ag is more than just a technology company. Drawing from six generations of farmers, Inform Ag is deeply entrenched in the farming world. This unique perspective shapes our approach, blending cutting-edge technology with an intrinsic understanding of the agricultural sector's needs.

By marrying tradition with technology, Inform Ag has established itself as a trusted partner for farmers seeking to navigate the challenges of modern agriculture, making it a leader in the field and setting a new standard for success in the agtech industry.

Why Choose Us?

- We customise the solution to your needs and support it all the way through.
- Cloud-based management and reporting from pumps and valves to sensors and integrations, with associated reporting.
- We have a built-in mesh Wi-Fi solution that allows areas with no or low connectivity to modernise and automate their operations.
- We are here for you through proven, top-quality and easily accessible support.
